

Geckolighting® LED Recessed Aluminium Profile

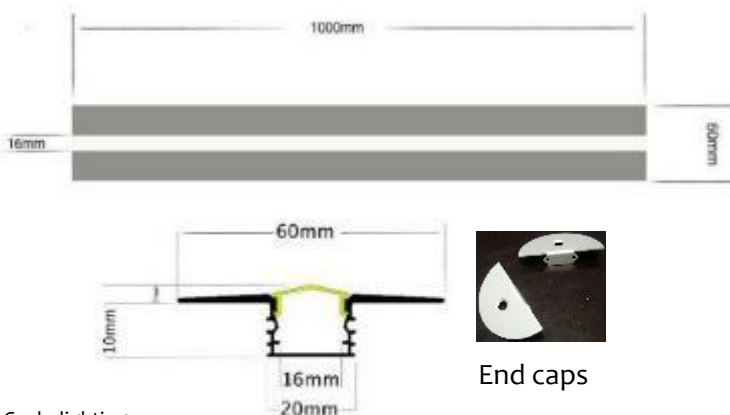

A range of aluminium profiles designed to house our LED strip lighting, giving professional results. The surface mount or recessed profiles come with diffusers and are able to be seamlessly joined together for desired length using our 5m rolls of LED strip. The recessed profiles are also available with imbedded LED strip in resin, making them a complete low voltage light fitting.

Surface mount or recessed aluminium profile – with or without LED strip set in resin.
